

VITA spa

VITALITY FOR LIFE

VITALITY FOR LIFE

You know vitality when you see it: the effervescent 75-year-old grandmother who swims two miles a day; the inspired florist whose passion for daylilies has you buying them by the dozen; the empathetic friend whose centered, calm demeanor seems to radiate inner peace. People with vitality overflow with that special something, and they stand out from the rest like shiny pennies.

All of which leads one to wonder:
Why do some people have more vitality than others?

Since vitality is often broadcast via physical traits – sparkling eyes, radiant skin, an energetic attitude – it's tempting to chalk it all up to good health. But there's more to vitality than robust physiology. Not all clinically healthy and ostensibly fit people seem particularly vital, after all. And some physically frail individuals still manage to emanate an extraordinary life force and joie de vivre.

To be sure, healthy choices generally lead more directly to vitality than unhealthy ones. But in many ways, the physical body becomes a mere display case for vitality's many treasures. See how Vita Spa hot tubs can enhance your vitality for life.

Vita Spa®
jets were
designed to heal.
Think of them
as your own
personal masseuse
waiting to work those
aches and pains away.
Our jets offer a variety
of effects and are completely
adjustable to personalize your
massage. Once you experience
their natural healing power,
you'll be left wondering
how you ever lived
without them.

A Vita Spa® is designed to deliver a complete back massage like you would receive at a massage clinic. There are five techniques that are commonly performed to improve circulation, relieve tension, and relax. Your Vita Spa® utilizes different jets and configurations to deliver these massage treatments.

Effleurage

This is a sliding or gliding massage performed along the back in a continuous motion. Effleurage is both relaxing and healing. This treatment uses powerful streams of water directed upwards along the back towards vital organs. Combining this with direct pressure jets creates an incredible, healing massage.

Petrissage

This “kneading” motion massage is commonly used for larger muscle groups. Rotating jets in Vita Spas create this kneading motion, relieving tension and pain locked deep in the muscles.

A woman with her hair in a bun is lying on her back, receiving a massage. Her hands are raised above her head. The therapist's hands are visible, performing a rhythmic tapping technique on her back. The background is a plain, light-colored wall.

Tapotement

This technique is a rhythmic tapping using the edges of the hands or lightly with the palms. A tapotement massage promotes blood flow and circulation to help the body carry away toxins and acids that can build up, causing pain and stiffness.

Circular Friction

This is also called cross fiber massage. A circular motion across the muscle fibers work to unlock stiff and tired muscles, relieving stress and increase mobility.

A woman with dark hair in a bun is lying on her side, receiving a Shiatsu massage. Two hands are shown applying pressure to her back. The background is a textured, light-colored wall. In the bottom left corner, there is a circular inset showing a wooden bowl filled with dried, textured herbs.

Shiatsu

Finger pressure, or Shiatsu massage, focuses on the acupressure points of the body for relief of aches and pains. The small, finger-sized jets are placed along these pressure points for a targeted massage.

Fact

There are over 200,000 nerve endings in your feet. These tie into your meridian lines and promote all over healing and relaxation.

Reflexology

Reflexology targets the nerve endings in the hands and feet that are connected to the entire body. Effectively massaging these areas is a key to complete relaxation.

Champagne Air

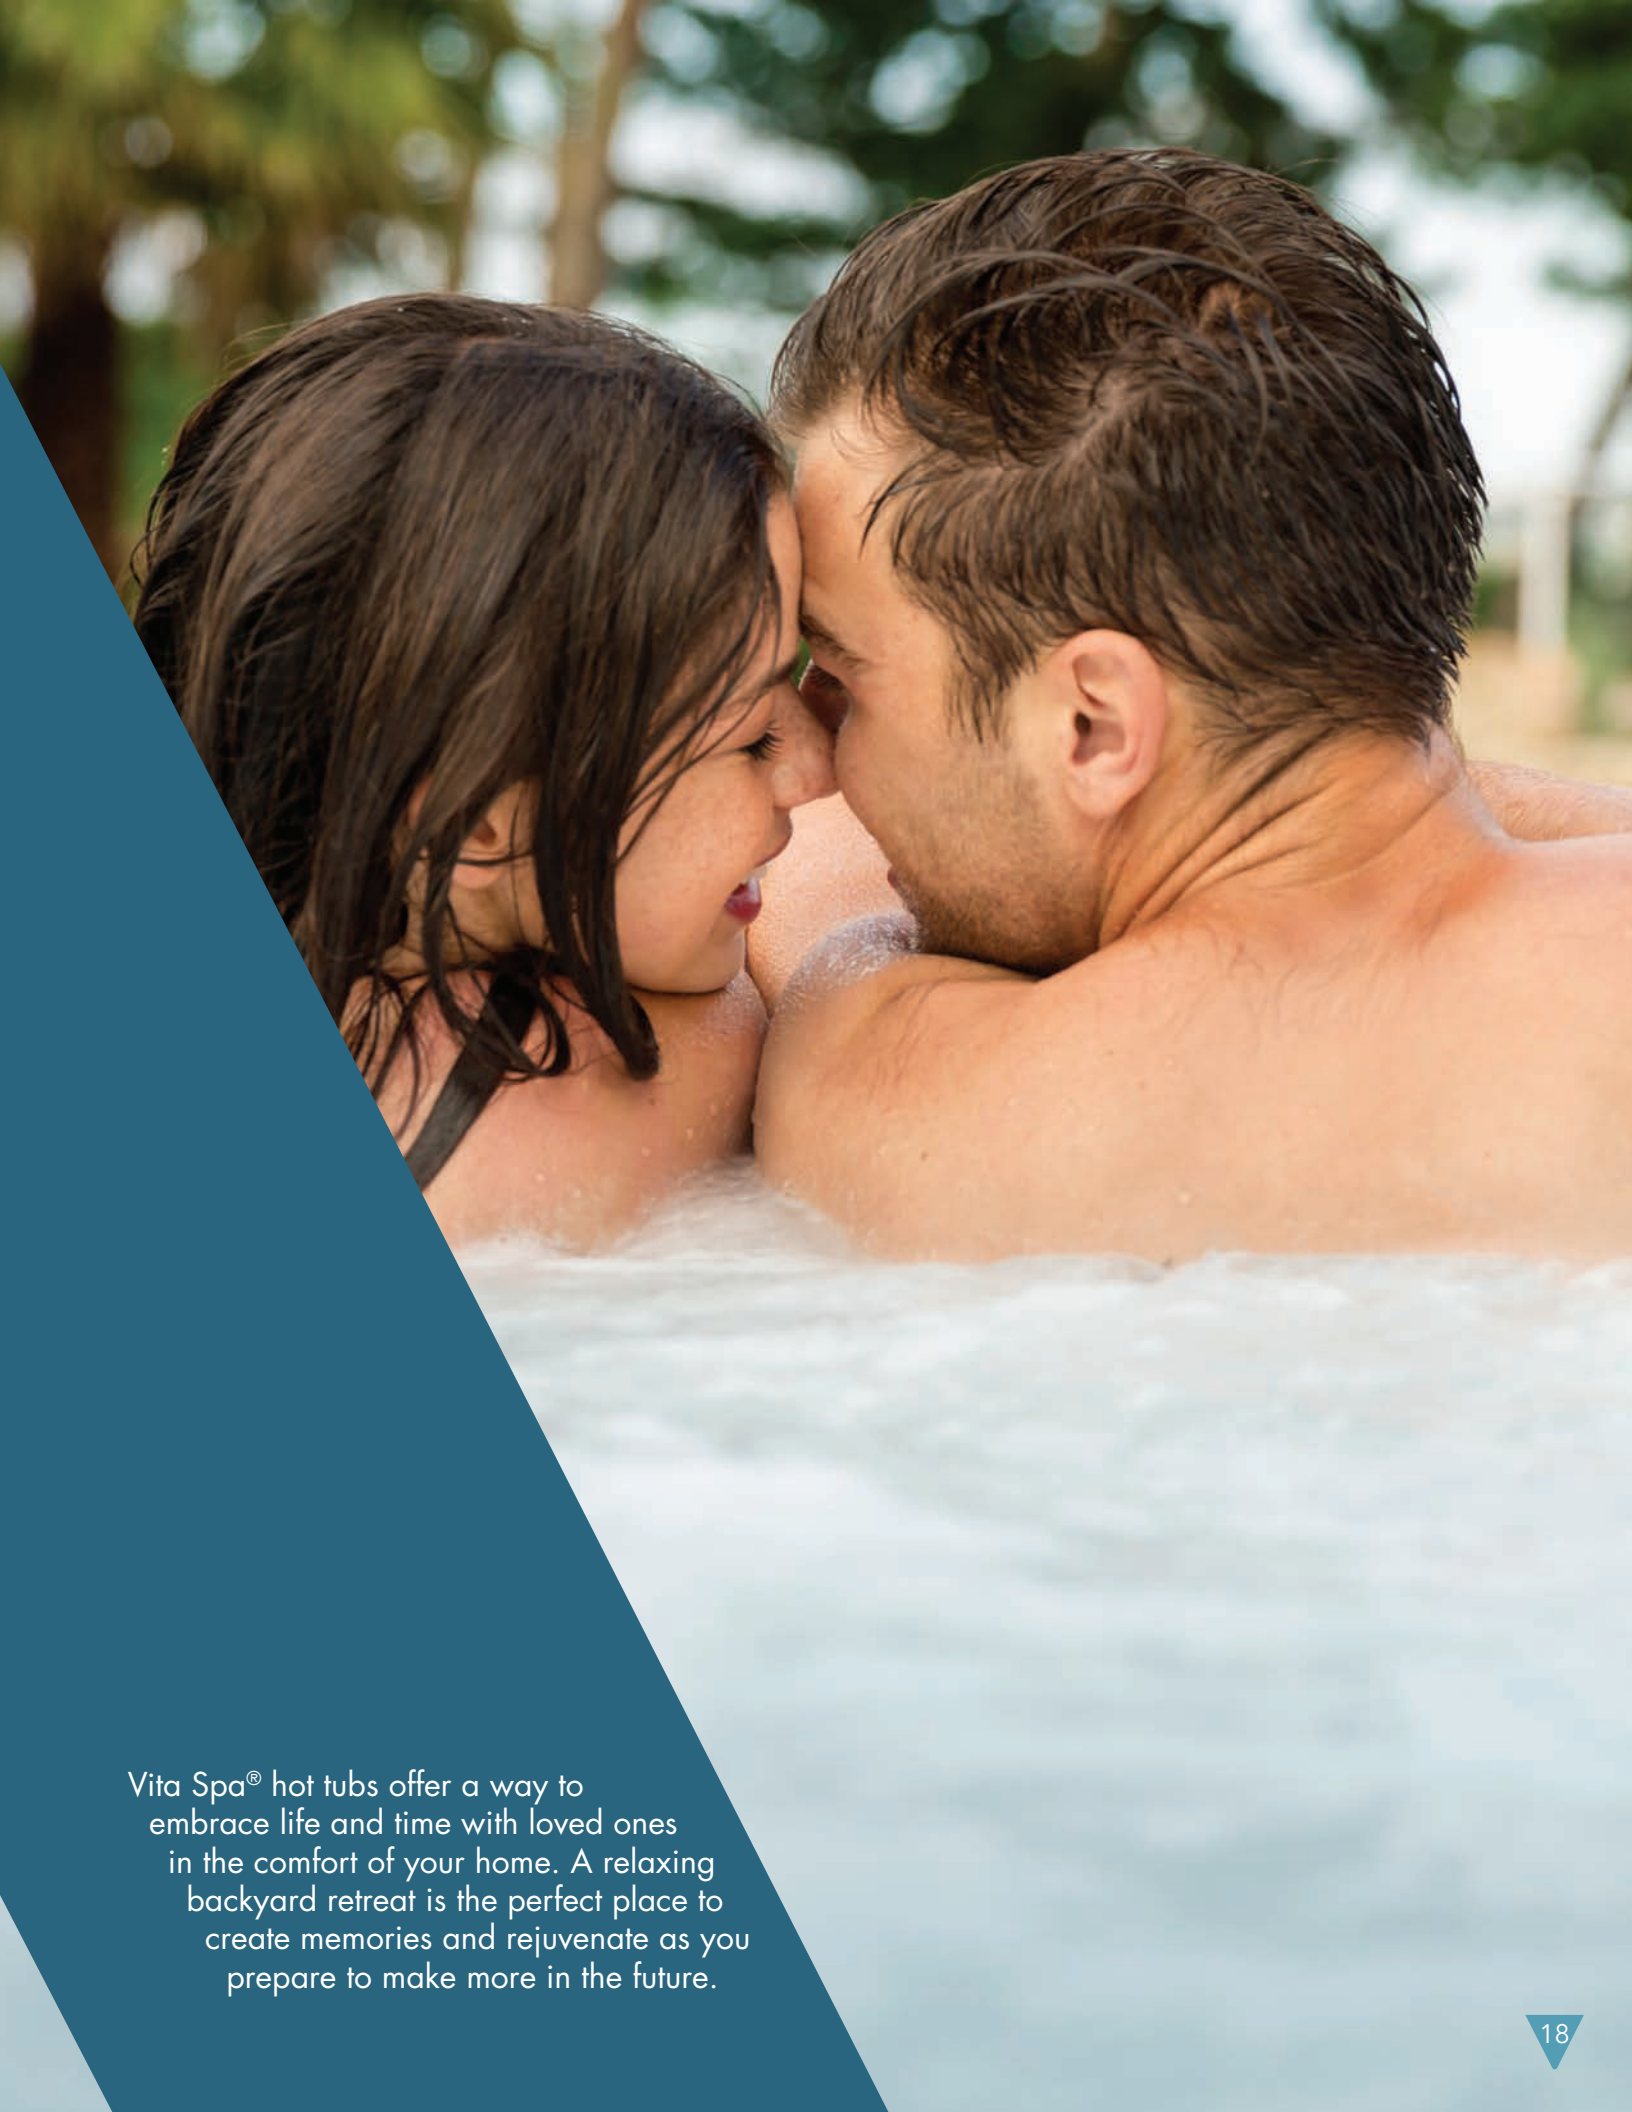

Champagne Air is a softer tissue massage using bubbles to caress sensitive sore muscles, help remove toxin build up, and relax the entire body.

LIVE YOUR LIFE

Time is precious and our goal is that you enjoy every moment. Vita Spa hot tubs have been engineered for ease of use and maintenance making hot tub ownership simple. Some features that have been designed to accomplish this range from our easy-to-use controls to our spa indicator light, appliance grade construction, Wi-Fi capability, Northern Exposure insulation, and clean clear water filtration system.

Vita Spa® hot tubs offer a way to embrace life and time with loved ones in the comfort of your home. A relaxing backyard retreat is the perfect place to create memories and rejuvenate as you prepare to make more in the future.

700/500 SERIES SMART TOUCH II

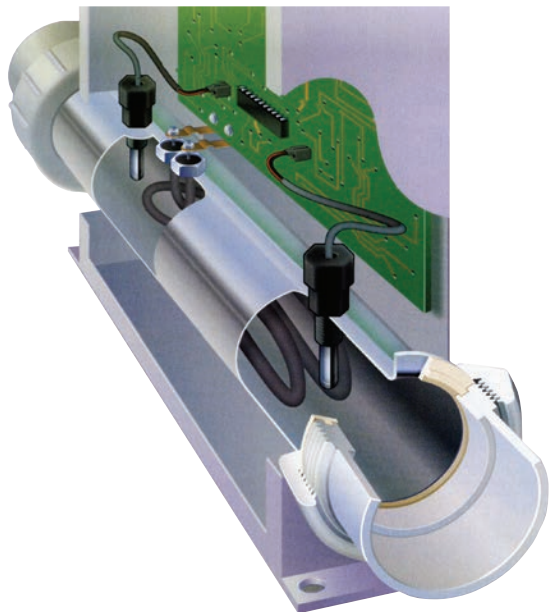

The Smart Touch II control panels are easy to read and allow you to change the temperature, adjust lighting and control your massage. This control works even when wet, letting you customize your experience even after you've climbed in to your hot tub.

World's first fully electronic spa

FULLY ELECTRONIC 56 FRAME PUMP

Vita Spa® hot tubs utilize Direct Drive 56 frame pumps in all models. These are larger and more powerful than the 48 frame motors found in most spas. This eliminates mechanical switches, allowing the pumps to run longer and more energy efficient.

POWERPACK WITH M8 TECHNOLOGY

Powerpack with M8 Technology is a revolutionary new hardware/software platform that completely eliminates mechanical sensor switches. The M8 platform features "Smart Sensors" to accurately and reliably measure water temperature.

KNOW YOUR SPA'S HEALTH AT A GLANCE

The status indicator light is a standard feature on 500 and 700 Series hot tubs, allowing you to check the status of your hot tub without opening the cover or app. The color changes from blue to red or flashes blue or red with corresponding error codes.

Fact

Clean, clear water in your hot tub means your skin absorbs only the purest elements. A daily soak can reduce blood pressure, blood sugar and speed healing.

Submerge yourself in purity

THE VITA SPA 700 SERIES FILTRATION SYSTEM

Our dual filtration system ensures that the maximum amount of water passes through the filters before it re-enters the spa. Filtration is driven by the powerful jet pumps, which rapidly circulate large amounts of water.

THE POWER OF OZONE AND UV, CLEANZONE® ULTRA

High quality water treatment is one of the most important features to consider when evaluating a spa. Both CleanZone and CleanZone Ultra utilize ozone to sanitize your water. CleanZone® Ultra adds UVC light, the same technology utilized in many communities around the world to purify drinking water. CleanZone® Ultra kills 99.9% of microorganisms, bacteria, viruses, and parasites, making this the perfect sanitization system for your spa.

Ozone/UV Combination

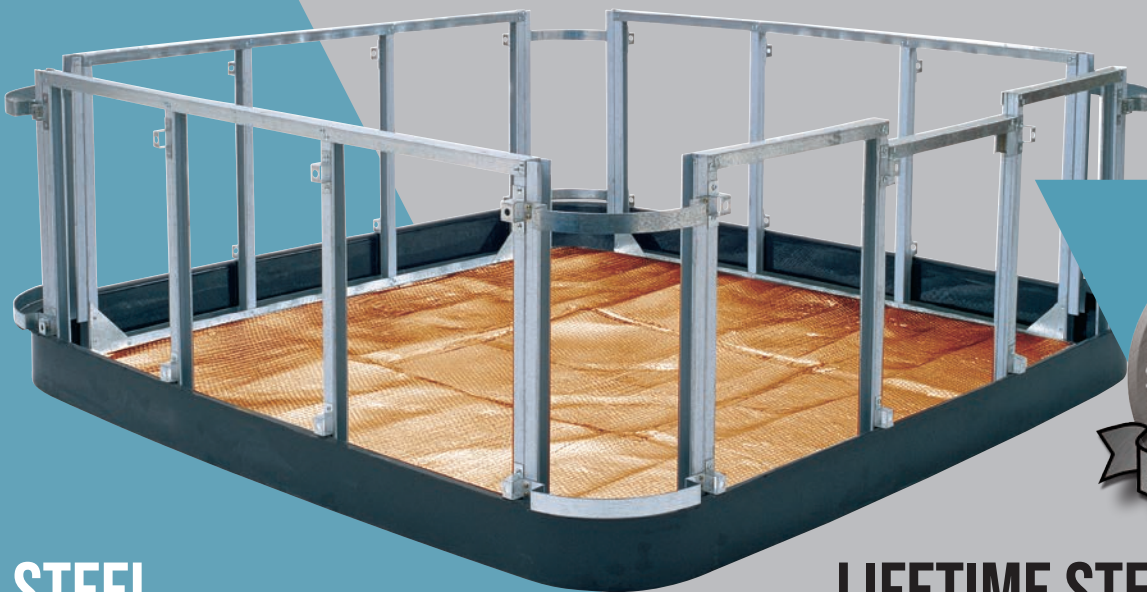

Ozone only

Superior Quality

The World's First Appliance Grade Hot Tub

The steel structure design in Vita Spa® 700 and 500 series hot tubs allows for complete service of the entire structure and all mechanical parts. The spa can be serviced and brought back to factory specifications right in your backyard. We call this feature "Appliance Grade."

STEEL SUB-STRUCTURE

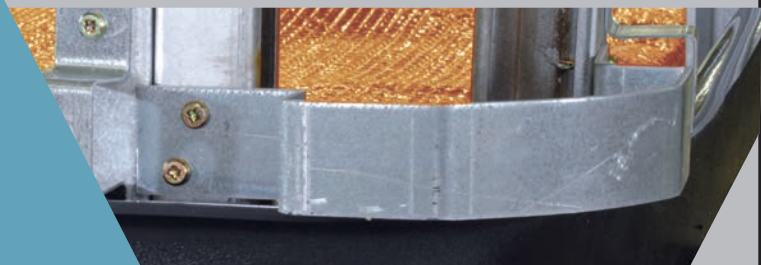

The Vita Spa® 700 and 500 series hot tubs have a steel frame which provides greater structural integrity than wood, as well as superior corrosion protection for a much longer life. It will not expand or contract with moisture.

The inorganic properties will never rot, warp, split or crack and eliminate worries of animal infestation or termite damage.

LIFETIME STEEL STRUCTURE WARRANTY

- 40% lighter, yet 250% stronger than traditional wood frames
- Weatherproof
- Corrosion-free

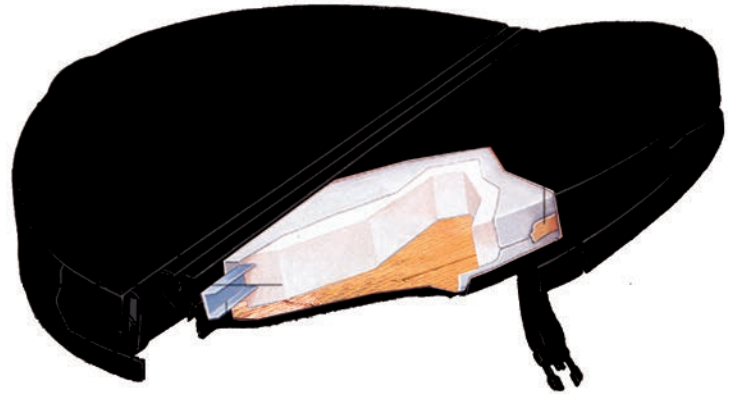

Sealed Top to Bottom

Appliance Grade Construction, Energy Efficient & Serviceable

WEATHER SHIELD COVER

WeatherShield covers are lined with our copper insulation sheet to improve heat retention. Double stitched seams for durability allow the cover to hold over 400 pounds. The outer shell is extremely weather resistant to fading while weighing about 25% less than other covers in the industry.

ABS SEALED BASE

The ABS Sealed Base is made of one-piece construction and provides a rugged foundation that seals the bottom of the spa, locking in heat and sealing out moisture.

SERVICE MADE EASY

Your Vita Spa® appliance grade hot tub can be serviced and put completely back together to factory specifications. This is not possible with conventional foam-filled hot tubs as they are extremely hard to service and are typically damaged in the process.

Servicing a foam filled hot tub.

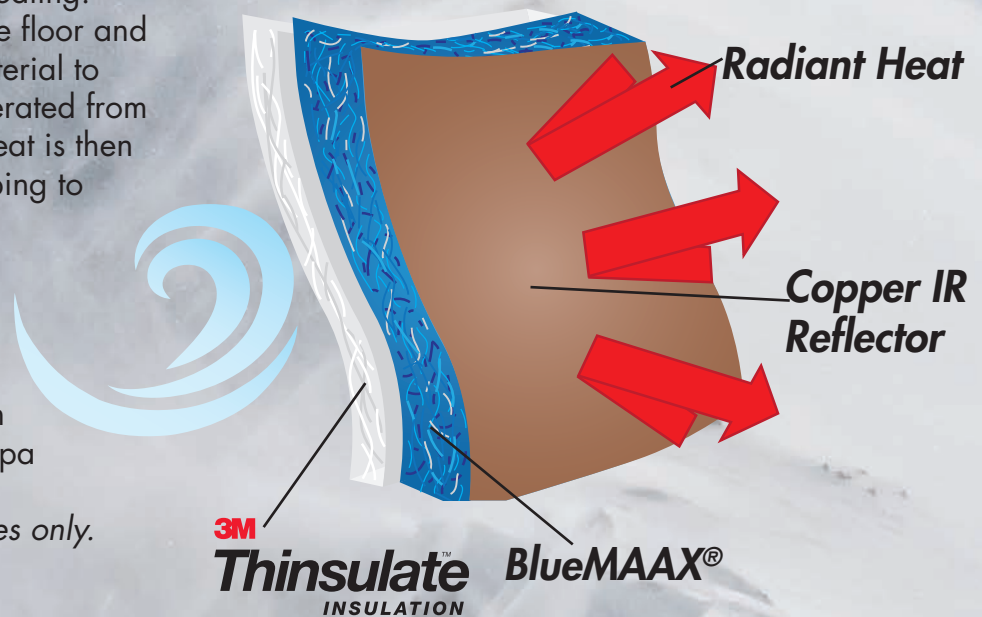

Built for the Toughest Environments

NORTHERN EXPOSURE® INSULATION SYSTEM

Northern Exposure® is a unique thermal barrier technology that recycles the free heat energy for more efficient heating. All four sides of the spa, plus the floor and cover are lined with copper material to reflect radiant heat energy generated from the pumps back into the spa. Heat is then absorbed by the plumbing, helping to maintain water temperature. Finally, the entire hot tub is insulated with 3M Thinsulate™, the same incredible material utilized in winter clothing. This three-layer, patented system ensures energy created by the spa stays in the spa.
Standard on 700 and 500 series only.

LIFETIME INSULATION WARRANTY

The insulation system in your new Vita Spa® hot tub is warranted to maintain the same insulation value it had at the time of manufacturing. As you enjoy your spa over the years, you'll feel secure knowing it can be maintained at the same high level of efficiency as the day it was made.

3M and Thinsulate are trademarks of 3M.

Color Choices

ACRYLIC COLORS

The attractive interior finish of a Vita Spa comes from the continuous cast acrylic. This is superior to Ethylene "soft plastic" surfaces. The hard, non-porous surface resists stains, fading, scratches, and chemical abuse. With the look of granite, pearl or metalescence, the extremely rugged and durable finish offers beauty and peace of mind.

A woman with long, wavy blonde hair is wearing a white bathrobe and holding a flute glass of champagne. She is smiling and looking down at the glass. The background is a soft-focus outdoor setting. The image is framed by a large blue triangle on the left and a dark blue triangle at the bottom right.

INDULGE THE SENSES

The 5 senses, sound, sight, smell, touch and taste all play a part in creating a complete experience. Vita Spa® hot tubs have been designed to harness all of your senses. Listen to the soothing sounds of music and water falls. Enjoy the visual dance of colored optic lights along the surface of the water. Breathe in the night air and smell of clean, clear water. Embrace the feeling of warm water and a soothing massage. Savor the taste of your favorite drink resting on our illuminated cup holder.

Combining these features with the therapeutic effect of water set to the perfect temperature and a vast variety of massage options will create your own backyard bliss.

Your hot tub doesn't have to be an "escape" from the elements; it can be used to enhance them. Utilize your customizable lights to mirror nature or recreate a moment in time giving you the same feeling as being there.

AQUAGLO®

COLOR THERAPY

Lights in your hot tub direct your mood based on the color, and your Vita Spa® has every option. While warm colors can stimulate increased circulation, appetite, and energy, cool colors are known to reduce stress and anxiety while promoting relaxation and the feeling of clarity.

AURORA CASCADES

A true illuminated laminar stream of water providing a soothing visual and sound effect.

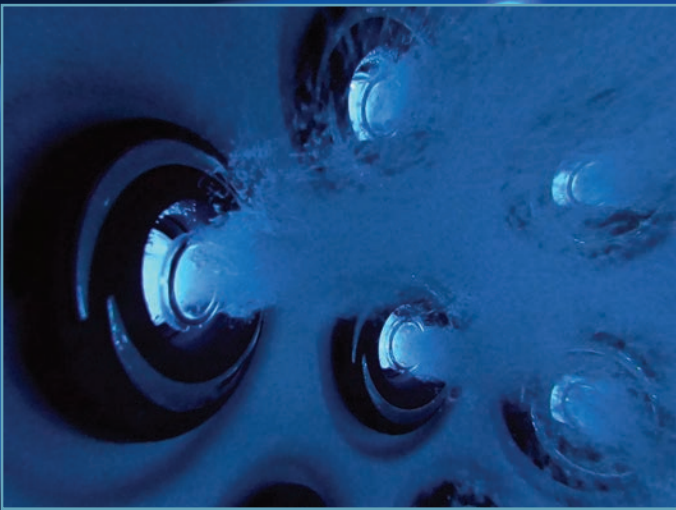

ILLUMINATED CUP HOLDERS

A comforting dip with your favorite beverage is the perfect combination. Vita Spa's Illuminated beverage holders add to the soothing light show.

NEW ILLUMINATED JETS PACKAGE

Illuminated jets are the newest dealer installed option that has been added to the AquaGlo lighting package. Major jetting arrays can be lit and controlled along with the other lighted features right from the control panel adding to your experience.

ILLUMINATED CONTROLS

Diverter valves are illuminated for easy use at night and distinction from the non-lit air control valves along the rail.

ILLUMINATED PILLOWS

Illuminated Contoured Pillow cradles your head for complete comfort.

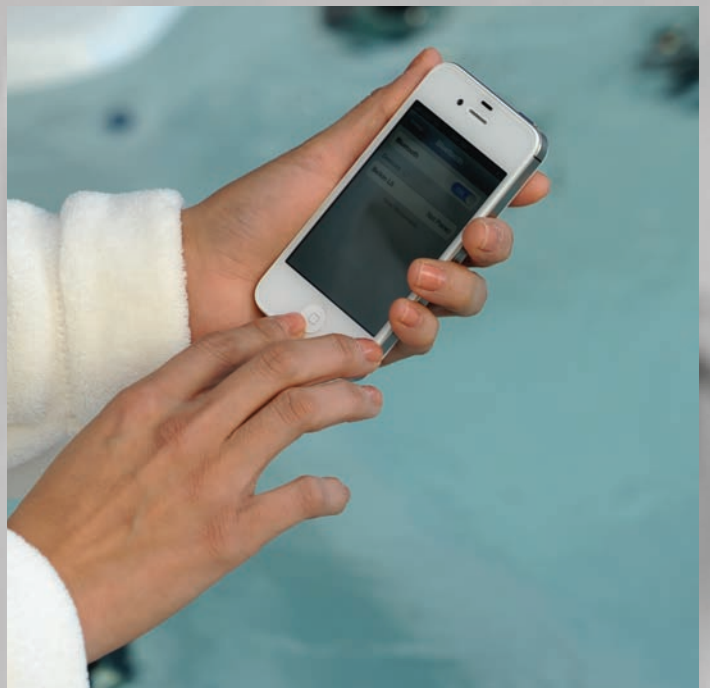

Superior Sound

VITA TUNES

Our Bluetooth Music System is both waterproof and corrosion resistant, with speakers that boast a crisp, clear sound for true music fidelity. The state-of-the-art Bluetooth technology puts the music at your fingertips. Enjoy your favorite artists and playlists anytime with this easy to use music system.

Vitality stems from a peaceful mind, a nourished body, and a zeal for life. Vita Spa® hot tubs bring all of these elements together so you live life to the fullest. Vitality for now. Vitality for later. Vitality for life.
